SUMMARY

I am a Full-stack Web Developer who enjoys solving problems and developing creative solutions. Being a fast learner is one of the core skills that I'm proud of. Seeking a challenging position to deliver solutions to business needs. I like to learn from different disciplines, people from different teams, or applications from different industries that provide an opportunity to capitalize on my technical skills and abilities.

PROJECTS

E Shop

E-Commerce Website

- Users on the e-shop site can interact with each other to purchase items. The owner or admin of the site can display his products to users, delete them and modify them so that users can buy these products, and users can search products within the site either by categories or according to the price of the product or the name of the product, and they can add these products to the cart.
